

**LINN**  
THE ONLY SOUND

KEY FEATURES INCLUDE

- A new technology wide-dispersion dome treble-unit with a neodymium magnet that produces a clean and open sound.
- High-density cabinet construction and two advanced Linn bass/midrange drive units, each with polypropylene cones and twin magnets designed to inhibit coloration and minimise distortion.
- The Ninka's high specification crossover ensures accurate music reproduction across the full frequency range with deep and extended bass.
- High quality internal cabling to the Ninka's input terminals deliver optimum signals to each drive unit.
- The Ninka's reliable drive units are fully shielded to enable placement close to a television or computer without causing picture interference.

The NINKA is an elegant, versatile, compact and powerful loudspeaker designed for all two channel and multi-channel applications. This attractive, two-way, infinite baffle floor-standing loudspeaker offers pitch accurate sound with substantial power handling and the ability to reproduce full range music at realistic levels. The NINKA outperforms the similarly-sized Linn Keilidh, Linn's most popular speaker.

The NINKA can be easily configured as a passive or an active loudspeaker. The input terminals on the rear of the NINKA enable simple, fast configuration either as a single-wired passive loudspeaker; a bi-wired passive loudspeaker; a bi-amped active loudspeaker; or as a tri-amped active loudspeaker. For passive playback, the NINKA's inputs connect to the crossover and for active playback additional inputs connect directly to the NINKA's drive units. Two removable, reversible-link connection boards (patent pending) on the rear of the NINKA identify and configure the appropriate input links for passive or active playback requirements.

The NINKA offers superior and accurate effortless performance with Linn or other high performance component sound or multi-channel systems. The NINKA comes complete with its own base stand and is available in attractive maple, black ash and American cherry finish from qualified Linn outlets world-wide.

## TECHNICAL SPECIFICATION

A new high performance floor-standing  
loudspeaker for both passive and active playback

┆	Introduced	2000
┆	Type	2way infinite baffle loudspeaker
┆	Frequency response passive	50Hz-20KHz +/- 3dB
┆	Frequency response active	38Hz-20KHz +/- 3dB
┆	Input impedance passive	4 ohms
┆	Input impedance active	6 ohms treble, 8ohms bass (per drive unit)
┆	Efficiency	90dB for 1W at 1m at 1KHz
┆	Minimum amplifier power	60W 4ohms
┆	Drive units	19mm treble with neodymium magnet, fully screened, 2 x 160mm bass/mid, cast chassis, fully screened
┆	Width	253mm
┆	Depth	275mm
┆	Height	976mm
┆	Weight	20kg each
