

KEY FEATURES INCLUDE

- I High performance CD player
- I Two pairs single-ended variable analogue audio outputs allowing direct connection to a Linn power amplifier
- I 24-bit Delta-Sigma Digital-Analogue Conversion
- I HDCD playback capability
- I Linn proprietary Brilliant silent power supply technology
- I Linn proprietary Remote-In / Remote-Out functionality allowing connection to Linn Knekt Multi Room System
- I Two pairs single-ended analogue audio outputs for primary system and distributed sound
- I Optional RS232 communications module allowing software upgrades and connection to home entertainment and automation systems

The Linn Genki is a new, versatile and pitch accurate component CD player. In an LK-style case, with a new multi-function display, the Genki is designed with both fixed and variable outputs so that it can be connected in the conventional way to a preamplifier or, using its independent local volume control output, be connected directly to a power amplifier.

With its fixed and variable volume control output a Genki can operate as part of a simple two room system, i.e. whilst serving in a conventional hi-fi system in one room, a Genki can also supply a second room.

The Genki utilises reliable surface mount electronics for optimum signal routing and has advanced error correction to manage imperfect disc quality. Other Genki advanced features include Linn proprietary Brilliant 'Silent Power' Supply technology, on-board Delta-Sigma conversion and HDCD playback capability. The Genki also accepts an optional RS232 communications module for control purposes, software upgrades and links to custom home entertainment and automation systems.

Standard and proprietary Linn Remote-In / Remote-Out connections can link the Genki to a Knekt Multi-Room System, and an optional RS232 computer communications interface port enables integration with custom automation systems.

The Genki, with Linn's advanced disc handling technology, is designed to offer value, application versatility and high performance CD reproduction accuracy.

<b>GENKI</b>
<b>TECHNICAL SPECIFICATION</b>
CD player

■	Introduced	1999
■	Type	CD player
■	Analogue outputs	Two pairs single-ended stereo analogue audio outputs
■	Output level fixed	2Vrms (peak code)
■	Output level variable	to 2Vrms (peak code)
■	Digital outputs	SPDIF digital audio electrical output
■	Conversion technology	Delta-Sigma at 24-bit resolution with HDCCD® decoding
■	Mains supply	Brilliant Slimline Power Supply
■	Power consumption	20VA approx
■	Size	W 320mm x D 326mm x H 80mm W 12.6 inches x D 12.8 inches x H 3.1 inches
■	Weight	3.3kg / 7.3lbs
