

THE LINN AKITO TONEARM

We are pleased to announce the introduction of a new Linn tonearm - the AKITO.

The Akito incorporates much of the technology developed for the Ekos tonearm. In order to achieve maximum strength and rigidity, high performance adhesives are used.

The one-piece headshell and the bearing housing are high-pressure die-cast for added strength.

The new larger diameter bearing assembly minimises friction and play. Every detail of the arm has been optimised.

This arm sets new standards of performance at this price level.

The Axis turntable will now be supplied with the Akito arm.

THE LINN AKITO TONEARM

SPECIFICATIONS

Lateral bearing friction	< 50mg
Horizontal bearing friction	< 50mg
Effectiveness mass	10g
Tracking weight adjustment	0 - 3g
Cartridge range	2 - 10g
Pivot to stylus	229mm
Stylus overhang	18mm
Effective length	211mm
