

## SEKRIT ON-WALL LOUDSPEAKER

The Sekrit on-wall loudspeaker is an extremely versatile, high quality loudspeaker which can be used in a wide variety of different locations. The Sekrit's slimline design and appearance make it possible to hang the loudspeaker on the wall like a picture and produce high quality sound without cluttering up your room.

The Sekrit utilises a high rigidity moulded polymer cabinet. By using this material, the designers of the Sekrit have managed to escape from the conventional 'box' shape of most loudspeakers, and instead, create a striking, yet pleasing design which would not have been possible had the cabinet been made from wood.

The durable cabinets and drive units makes it possible for you to install On-Wall Sekrit loudspeakers in places you would not normally consider. They are equally at home in kitchens, bathrooms or even the most elegant lounge setting.

### On-Stand Sekrits

The On-Wall Sekrit will also be available with a stand, which is designed to utilise the minimum of precious floor space and be used close to the wall. The stylish design of these stands will fit in well with televisions and other audio visual equipment.

### Sekrit as part of Multi-Room

Sekrits are ideally suited to surround-sound installations as both front and rear channel loudspeakers. Alternatively a single sekrit mounted on the wall behind your television makes a good centre channel loudspeaker.

In keeping with Linn's philosophy, the Sekrit On-Wall loudspeakers are fully upgradeable, each stage providing a notable improvement in acoustic performance, through bi-wiring and bi-amping.

## Sekrit On-Wall Loudspeaker Technical Information

Type	2-way Reflex-loaded loudspeaker
Frequency Response	Passive: 60Hz - 20Hz +/- 3dB
Input Impedance	Passive: 4 Ohms
Voltage Sensitivity	90dB/2.83 Vrms at 1m
Amplifier Power	Minimum: 30W/8 Ohms, 60W/4 Ohms
Features	Treble level can be reduced by 1dB on crossover board
Wiring Options	Single wiring, Bi-Wiring, Bi-Amplification
Drive Units	25mm aluminium alloy dome tweeter 170mm custom bass/midrange
Dimensions	Height 475mm Width 252mm Depth 123mm Weight 5.8 Kg each
