

LINN KEILIDH LOUDSPEAKERS

Designed to communicate the sprit of a Scottish ceilidh, the Linn Keilidh loudspeaker delivers an outstanding level of performance and value. The Keilidh's proportions, real wood finish, and unique frameless grille give it the same elegant styling as Linn's top-of-the-range Keltik Aktiv loudspeaker.

The floor-standing design of the Keilidh maximises internal volume while occupying slightly less than a square foot of floor space. To enhance stability and performance, an integral base plate is fitted with adjustable floor spikes. Additional performance advantages may be realised through the use of Linn's optional granite composite base plates. Also fitted with stabilising floor spikes, these optional stands provide a larger foot-print, lower centre of gravity, and increased mass, further improving stability and resolution.

The Keilidh is an extremely versatile loudspeaker and can be used in a particularly wide range of configurations, making it easy to upgrade a hi-fi system in affordable steps.

A two-way system, the music signal to the Keilidh is split between a treble and two mid/bass units, and possible configurations range from single-wired passive through a variety of upgrades to fully active performance.

SPECIFICATIONS

Introduced:	1992
Type:	2-way Infinite Baffle Loudspeaker
Frequency Response:	45Hz-20kHz +/- 3dB (Active) 65Hz-20kHz +/- 3dB (Passive)
Input Impedance:	8 Ohms per drive unit (Active) 4 Ohms (Passive)
Efficiency:	92dB for 1W at 1m (1kHz)
Minimum Amplifier Power:	60W / 4 Ohms
Drive Units:	19mm ceramic-domed treble, 2 x 160mm carbon-loaded polypropylene bass/midrange
Applications:	Single-wired, Bi-wired, Bi-amped, Active Bi-amped, Active Tri-amped
Size:	W 200mm x D 275 mm x H 825mm
Weight:	18kg each
