

LINN

KISTO & KINOS system controllers

Information for installers

The KISTO and KINOS system controllers are factory set to output a PAL/YPrPb video signal. If you wish to change this to NTSC/(YPrPb or other signal type), do the following.

1. Press and hold **SETUP** on the handset until the Main Menu screen changes to the Installer Menu screen.

Then, using the navigation keys in the middle of the handset:

2. Enter the Edit User Profile menu.
3. Enter the Video Options menu.
4. Change the Video Type item to **NTSC**.
5. Change the Watch: Default Mode item to the required setting.
6. Select **Save**.
7. Exit setup.
