

**LINN**  
THE ONLY SOUND

#### KEY FEATURES INCLUDE

- I Upgrade option over standard Ninka stand.
- I Polymer concrete.
- I Fully adjustable spikes.
- I Low centre of gravity.
- I Widens footprint of speaker.

An extremely elegant upgrade, this new stand is designed to improve the performance of the Linn Ninka Loudspeakers by widening the footprint and lowering the centre of gravity, thereby improving the stability of the loudspeaker cabinet, which, in turn, allows the drive units to work more efficiently and accurately.

Additionally, the heavy and very inert, black granite, polymer composite material used in the manufacture of these stands helps to reduce cabinet colouration and, unlike many materials used for loudspeaker stands, does not 'ring' or add any mechanical noise in itself.

The improvement in dynamics and information is significant and allows for an even more involving, musical experience with these already well regarded loudspeakers.

The stands are easily coupled to the base of the Ninka loudspeaker and the supplied floor spikes can be adjusted through the top of the stand to enable a fast and very stable set up.
