

LINN

KEY FEATURES:

- I Reference standard video and superior pitch-accurate sound quality
- I Plays all major quality disc formats - SACD, CD, CD-R, CD-RW, DVD-Video, DVD-A, DVD-R, DVD-RW, DVD+RW, Video-CD, Super Video-CD, MP3 and JPEG
- I Unique patented Linn circuitry
- I Progressive Scan
- I Dolby® Digital and DTS® Digital Out
- I High-quality surround sound, regardless of the source
- I High-quality Linn metal drawer mechanism
- I RS232 and KNEKT interfaces
- I 5>2 channel down-mix
- I 128 x 32 Graphical Monochromatic Display

The UNIDISK 2.1 player from Linn is a universal source component engineered to deliver reference standard video and superior pitch-accurate audio performance. The UNIDISK 2.1 player has been designed to maximise the video performance of existing software and provide immediate higher quality access to new high definition music and movie formats for a totally involving entertainment experience.

Based around Linn's proprietary SILVER DISK ENGINE™ universal decoding technology, UNIDISK 2.1 unifies high performance audio and video sources and embraces the latest 5" optical disc formats (including Super Audio CD, DVD-Video and DVD-Audio) for total flexibility in any audio-visual application. The player offers a range of performance-enhancing features (including Dolby Digital, DTS Digital and Progressive Scan) and houses a premium high-tensile metal drawer.

The UNIDISK 2.1 player is a precision-engineered source product for the quality-driven home entertainment enthusiast that will noticeably improve the performance of almost any system.

UNIDISK™ 2.1 PLAYER

TECHNICAL SPECIFICATION

A precision engineered universal source component

	Date of Introduction	August 2003
	Type	Universal source component
	Size	(H) 80 mm x (W) 381 mm x (D) 368 mm
	Weight	4.9 Kg
	Function	Universal Disc Player that supports all major quality disc types
	Supported Disc Types	CD SACD (Super Audio CD) DVD-Audio DVD-Video VCD and SVCD Data discs containing MP3 and JPEG Files CD-R, CD-RW DVD-R, DVD-RW, DVD +RW
	Audio Decoding	PCM, LPCM and MP3 streams for simultaneous analogue/digital stereo output DSD (from SACDs) and MLP (from DVD Audio) for analogue only output (max 6 channels) Dolby Digital to Lt/Rt Downmix Outputs undecoded digital data for Dolby Digital and DTS DigitalOut
	Video Decoding	PAL, NTSC US, NTSC World Aspect Ratio: 4:3 Pan Scan, 4:3 Letterbox, 16:9
	Digital Audio Outputs	TOSLINK™ Output SPDIF BNC Outputs
	Analogue Audio Outputs	5.1 Phono socket outputs (Front L, Front R are double connectors) Stereo XLR Balanced Audio outputs
	Video Outputs	Progressive Scan - YPrPb – BNC connections Interlaced YPrPb – BNC connections R, G, B – SCART output 2 x S-Video outputs 2 x Composite outputs
	Control	RC5 input and output (Knekt) RS232 In & Out (RS232 & Flash Upload) 6 button keypad interface 128 x 32 Graphical Monochromatic Display On screen and front panel text display for SACD On screen set-up menu
	Power Supply	Switching power supply with auto-ranging (90 V to 240 V a.c. 50-60 Hz)
