## Installing LEIA DS on the Nokia N800/N810

V2.0. October 18th 2008

Installing of the LEIA DS software (supplied by Axel Sommerfeldt)

1. Select I*nternet > Web*
2. In the address bar type: *www.leiads.sommerfee.f-m.fm/stable/*
3. Double click the link *leiads_*.*-*-armel.deb* (the *.*-* being the current software version.

Changing the Nokia N800/N810 network settings.

In Nokia ,

1. Select the Network icon in the top right menu bar, next to the battery.
2. Select the connectivity setting,
3. Click on the "Idle times tab" and
4. Change the WLAN IDLE time to Unlimited and OK.

The network is now set to be on permanently and can only be shut off via a flat battery or physical Nokia switch off.

Check the site http://www.leiads.sommerfee.f-m.fm/ for instructions for use.

This Nokia software works in conjunction with the LINNGUI PC software.
